Commissioner Jane Henney:

I'm a member of the Center for Science in the public Interest and want to urge you to ban the widespread use of antibiotics in animal feeding. Adding these antibiotics to promote growth can make bacteria resistant to those drugs.

When we get sick, these same bacteria will be ~~more~~ more difficult to treat. Eventually, they may be impossible to treat. Why should we endanger our future health, just to increase profits for the producers?

I support the petition filed by CSPI, and ask that you consider the health of the consumer by outlawing this practice. Thank you.
